

TWENTY-FIFTH YEAR

No. 26

GLEICHEN, ALBERTA, WEDNESDAY, SEPTEMBER 16, 1931

SUBSCRIPTION \$2.00 PER YEAR

**MISS A. MACPHAIL M.P.
K. B. SANDWELL
TO SPEAK HERE**

Gleichen will have the privilege of hearing Miss Agnes McPhail, M.P., in November, and Mr. K. B. Sandwell, one of Canada's leading economists or about the 29th of this month.

These speakers are coming under the auspices of the Canadian Club and the executors of the local branch consider it is very fortunate in being offered such outstanding speakers.

Miss McPhail needs very little introduction. She is an international personage now, a very good speaker and her subject will be "Canada and the Disarmament Problem". You'll hear more about the meeting at which she will speak later.

Mr. Sandwell needs no introduction to many people as he writes frequently for McLean's Magazine and The Toronto Saturday Night. He is first an economist and next he is a humorist who can talk as well as he can write. He is on a speaking tour throughout Western Canada. He is an experienced and fluent speaker combining a sense of humor with a thorough grasp of his subject. He has spoken to numerous Canadian Clubs in the East, and has been invited to return on many occasions.

His principal subject is "Unemployment Insurance". He has made a very considerable study of this subject and was engaged by a number of businesses to make a survey of its economic aspects. He has alternative subjects as follows: "The Problem of Divided Sovereignty in Canada", "Canada and the World Depression", "The Arts and Crafts of Canada".

What one would you like? A phone or a letter to this paper will be passed on to the Canadian Club executors. Final arrangements for the meeting are as yet made. Nothing is assured, but that is the meeting will open to the public.

Watch for notice of definite date and keep it open. You won't regret it.

SOME PURITAN CUT-UPS

Those who depend on the regular historical works of the school-book type no doubt have formed the idea that the Puritan forefathers (and foremothers of New England) were about as perfect as folks could be.

The inconceivable have been worked again, however, and have dug up some old records which appear to show that human nature was about the same in the old days as it is at present. A recent writer quoted at length from a Massachusetts court docket of 1646, of which a few sample cases are given as follows:

Henry Walton fined for saying he would as leave hear a dog bark as to hear Reverend Cobbell preach.

John Studley fined for stealing his master's ox and selling it to him.

Thomas Gray of Marblehead whipped for being overseen in drink.

Phillip Crumwell fined for being in drink three times in two days.

Mrs. Griffith fined for swearing.

Sarah Parrig fined for weaving a silk lood.

Sarah Collins fined for railing at her husband and calling him "a pot gutted devil."

Miss Ivy Humes, of Drumheller is visiting at the home of Mr. and Mrs. Pineau.

Report all items of interest to this office. They will be appreciated and each item will help to make the paper that much more interesting. We can not get all the news but by your help we can get the lion's share and then what we wish to do. We want all the news that's news.

We take it for granted that parents are as much if not more interested in the advancement of their children at school as are the teachers and no teacher takes delight in a pupil's failure. The management simply wishes to call the attention of the parents to the facts in the case and, if possible, to make a demand, that nothing be allowed to interfere with the progress of their children in school work.

**UNITED CHURCH
HOLD SPECIAL
RALLY SUNDAY**

A special rally of the congregation of the local United Church is being planned for next Sunday, September 20th. In the morning the usual Rally Day Program will be used. There will be special music and Rev. Mr. Lyle's supplying the pulpit at Arrowwood so that Mr. Gilbert will be able to be present at the morning service.

Representatives from the Eventide Home and form local Anglican Church will assist in the evening worship. Since the first of July Rev. V. M. Gilbert, B.A., B.D., has been the minister in charge. He is Canadian born and came west under the Methodist Church in 1907. The next year the conference which met at Medicine Hat received him as a candidate for the ministry. Returning east for study Queen's University, Kingston, Ontario conferred on him the Bachelor of Arts degree in 1914. His Testamur was granted by St. Stephen's Edmonton in 1916 and he was ordained that year. While serving the Millet charge he took post graduate studies in the Provincial University and in 1917 received from it his Bachelor of Divinity.

Mr. Gilbert was also a student at Queen's. Her family were connected with Cock's Presbyterian Church Kingston, where her father has been an elder for over thirty years. She came west with a group of student teachers in 1914 and in 1916 they were married by Rev. J. C. Anderson, B.A., in the manse at Camrose. She went as a bride to Millet and the next year moved to Winnipeg where Mr. Gilbert taught on the staff of Wesley College.

Since returning to the province they have served on several charges: including Bow Island, Springbank, Olds and Rockyford, and comes to Gleichen with a splendid past record. During his short stay here Mr. Gilbert has shown himself to be a very energetic and good will of his congregation.

**U.G.G. LIMITED
DECLARE FIVE
PER CENT DIVIDEND**

Mr. R. S. Law, President of the United Grain Growers Limited, announced at the conclusion of a meeting of the Board of Directors of United Grain Growers Limited, that a dividend of five per cent has been declared on the capital stock of the company, for the financial year July 31st, 1931. Cheques have been mailed to the 30,000 shareholders of the company.

The accounts for the past year are still in the hands of the auditors, and are not yet ready for publication, but it is intimated that the balance sheet will show a strong liquid position and that the earnings for the year, after bond interest and depreciation, were sufficient to justify the payment of a dividend.

While a reduction in grain handling during the current crop year is considered inevitable on account of the small crop produced in Western Canada, United Grain Growers elevator are fairly well located with respect to those districts in Western Canada which have from fair to good crops this year, and there are comparatively few elevators of the Company in those districts which have experienced complete crop failure.

It was also stated that a release of farmers from contracts to market grain through other channels is resulting this year in an increased percentage of deliveries to United Grain Growers elevators at a large number of points.

United Grain Growers now have 46 country elevators in Manitoba, Saskatchewan and Alberta, a terminal elevator at Port Arthur with a capacity of 5,500,000 bushels, and a terminal elevator at Vancouver with a capacity of 1,000,000 bushels. One of the most important developments of the past fiscal year was the re-entry of the Company into the business of exporting grain, which had been temporarily discontinued.

**INTERESTING NEWS
ITEMS OF
MILO HAPPENINGS**

Mr. Ferngreen, former Milo, butcher is now living on his farm south west of Milo.

Mrs. Martin, mother of John Martin and Eaton Bososto, has returned and is now living in Milo again.

The prohibition problem has been solved as far as the farmer is concerned and we can no longer afford a 10 cent glass of beer and if it was not for the men working on the section gangs and the few people in town who pull down a monthly salary, the beer parlors might as well close up.

Mr. Wm. Hill former rancher in the Buffalo Hills, well known to all old settlers here has just returned from a trip to Ireland his birth place. Mr. Hill came through Milo last week and was expecting to meet Mrs. Hill who is coming up from Long Beach, Cal. where they have resided of late years. After that they expect to arrive back to Long Beach again.

Some of our absentee land owners who generally visit us once a year have appeared on the scene again. Among those are Toney Beggs, Jas. Aasgaard and his son Louis, who are all living in Long Beach, California when at home. Mr. Aasgaard is looking as young as ever and I think this annual trip does him lots of good. The pickings are pretty slim this year, but then they may not need money as big as those who live here.

The motions of cutting, threshing and hauling have practically all been going through and there was no little excitement about the whole thing that a fellow scarcely realizes it all over. The wheat yielded all the way from 2 to 15 bushels per acre, the average would probably be around 7 and 8 bushels. In one or two cases a 20 bushel crop is claimed but it is hardly believable. Most of the wheat is good and at 32 cents a bushel, street price, why worry about finding a good investment for the money.

Our small towns are dead compared with most years in the past where the farmers had a few dollars to spend after harvest. This year no strange men are sitting around on the sidewalks interviewing farmers for a job. The farmers wives, who used to require help in the kitchen when the big crews had to be fed, now do it all themselves and, as a matter of fact, they would have no money to hire anybody. I can hardly help comparing the early years, when, at this time of year, one could meet strings of grain haulers, miles long, coming over the various trails hauling wheat to Clurt, or Gleichen and the swift life and rush going on in these towns in the evenings. Yes, it was a long haul, but at the same time in those early years, we had good crops and got enough for them so we could pay our bills and still have money when we got to town if we were posed after getting their 1867 when a farmer hauls a load of wheat to the elevator he is lucky if he gets his truck back for if he has a low grade of wheat it takes more for transportation than the wheat will bring.

Cliff Bogstie returned last week from Edmonton where he went with the Ponoka baseball team. Cliff won his game 5-1. The Edmonton Bulletin has the following to say of his pitching: A young chap by the name of Bogstie who throws from the portside handcuffed the Seconite hitters in the first game with his baffling assortment of hooks and slants in a fine pitching exhibition. Bogstie who shapes up as a promising mound prospect and is 19 years of age struckout 16 of the prominent champions and allowed but four bingles, only one going for extra bases. The score being 5-1.

Stan Haskayne is spending his holidays at Manville, Alta. He went up by motor truck taking some livestock with him.

**SCHOOL FAIR
HAS MANY
FINE EXHIBITS**

Tuesday the Gleichen School Fair was held here for the first time in three years and was a real success. The entire district participated in the same. While in former years Indian Departmental Schools were competing it was found best not to extend the participation beyond the provincial district schools. According to a report from Mr. W. S. Benn, supervisor of the fair, the Gleichen exhibits compared well with other districts considering that this is the first fair held here for sometime. Inspector Boyce and Mr. Benn addressed the gathering shortly at the close of the judging. Mr. W. S. Benn judged the roots and vegetables. Inspector Boyce with three assistants was in charge of the schoolwork. Miss G. M. Pokotilo of the Claresholm school staff judged the cooking and sewing exhibits and Mr. John Eaglesham took charge of the grains and livestock competition. Sports were held in the afternoon under ideal weather conditions. Great enthusiasm has been created by this fair and no doubt the school fair will again be a permanent event to be looked forward to from year to year. Next week we hope to print the list of prize winners.

JOHN THOMAS LLOYD

John Thomas Lloyd, 13-year-old son of Mr. and Mrs. J. T. Lloyd of Arrowwood died Sunday in a Calgary hospital after an illness of five weeks. He was born in Gleichen and had lived in Arrowwood most of his life where he attended school. He is survived by his parents and one brother. The remains arrived in Gleichen Tuesday morning, the funeral services taking place that afternoon at 3:30 from St. Andrew's Church, which was filled with friends from Arrowwood and Gleichen. Rev. J. R. Davies officiating and interment taking place in the Gleichen cemetery.

The following were noted among the flowers.

Mr. and Mrs. Lord and family, Mr. and Mrs. Leslie Long and family; Mr. and Mrs. Stevenson; Mr. and Mrs. Frank Hall; Members of the Arrowwood U.F.W.A. Mr. and Mrs. Roberts; Mr. and Mrs. R. R. Saunders and Arthur; Mr. and Mrs. Stott and family; Mr. and Mrs. James Ward; Walter and Edith Steiner; From Johnny's school; Buddy and Thelma of Calgary; Mr. Allgood and daughter; Mr. and Mrs. Wm. Thompson; Mr. and Mrs. Cornborough and family; Norah and Shorty House; Boynton Christensen; Walter and Gladys Ward; L. F. Christensen, Carol and Eileen; Mylvia; Maxine, Lorine; Mr. and Mrs. Olstott; Mr. T. Barr; Arrowwood Women's Institute; Mr. and Mrs. Wm. McConnell and Jean; Mr. and Mrs. White; Mr. and Mrs. Hall; George and Jack Roberts; Mother, Daddy, Billy and Gertie

CARD OF THANKS

Mr. and Mrs. Lloyd wish to thank their friends for their many kindness shown them during their recent bereavement.

The Battery softball artists defeated the Roughriders 12-2 last Thursday evening. This is the second time the Battery has beaten the Roughriders this season.

Arthur Brown left over a week ago for Ontario where he has a permanent job. He left on a side-door pullman.

**ST. ANDREW'S CHURCH
SERVICES**

SEPTEMBER 20th, 1931
Holy Communion 9:00 a.m.
Morning Prayer and Sermon 11:00
Children will get their marks and Sunday school papers after this service.

No Evening service in Gleichen. Harvest Festival at Lomond 7:30. Sunday, September 27th, Harvest Festival in Gleichen. Please keep this date free.

**BOARD OF TRADE
HOLD SHORT
SESSION MONDAY**

The Gleichen Board of Trade held a short session Monday evening in the Club Room of the Community Hall.

Among the correspondence was a letter from Edmonton stating that the town planning expert Horace Seymour wished to speak in Gleichen on "Problems of Urban communities". It was decided to defer action for a time.

On motion of Messrs. Brown and McKay it was decided to ask Mr. R. Umbrite support to have the grade on the hill northwest of town near the oil well, graded and put in good shape. A vote of thanks was extended to Rev. J. R. Davies for his efforts in taking the boys to camp at the river this summer.

Another motion was made extending an invitation to Mr. Reader of Calgary to come to Gleichen in March 1932.

Messrs. McKay and Mattson moved and carried that we ask the town council to look into the possibility of erecting a rink without a roof as a relief scheme.

The Board of Trade decided to sponsor the Old Timers dance and a committee was appointed to report at the next meeting.

Mr. Brown and Mr. Gilbert volunteered to interview ratepayers and try and get the petition signed asking town to take over hall.

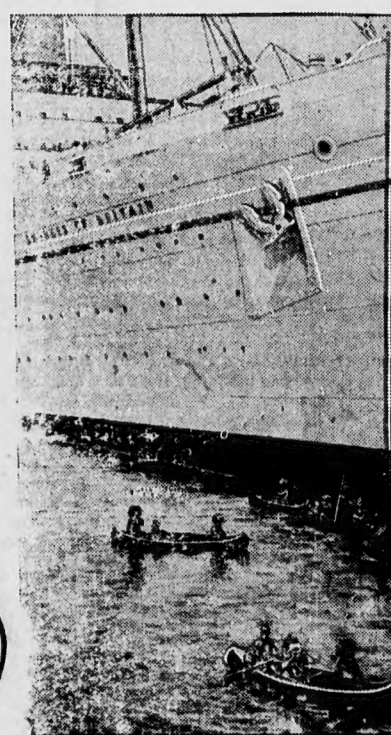

A gentleman at one of our boarding houses, after having beans shoved at him each meal for two straight weeks asked the waiter to please read the eighth verse of the thirteenth chapter of Hebrews. We imagine this will make some of our readers get the dust off their Bibles.

The C.P.R. announces the new express rates including free delivery, and free pick-up are as follows: Fruit and vegetables forty cents per hundred pounds minimum 40c. general merchandise on shipments of one hundred to three hundred pounds one dollar and twenty cents per shipment. Ordinary rates apply to shipments less

R. W. BROWN
GLEICHEN ALBERTA

SAGO TEHONIATARAKOWA!**"Greetings, Chief Swiftest Rider
Of Mighty Waters"**

Honours have been heaped upon Captain R. G. "Jock" Latta, commander of the trans-Atlantic record liner Empress of Britain since his new 42,500 vessel regained the Blue Ribbon of the Atlantic for the British Empire by all classes of people but none have been more sincerely offered than the recent tribute of the Six Nations Indians.

Encamped at Loretteville, Quebec, where they are establishing a village in which the ancient arts of the redman are practiced, members of the Six Nations under the leadership of 81 year old Chief Wolverine recently honoured the Canadian Empire by adopting him into the tribes and transferring chieftainship upon him as a tribute to his feats of seamanship with the big white "war-canoe".

Meeting the Empress of Britain in their gaily decorated birch-bark canoes a score of braves and Squaws, led by Wolverine, Running Bull, American Horse and Princess White Eagle, danced their ceremonial dance on the Games Deck of the mighty liner, stood in reverent silence while the old Chief invoked the great spirits and rent the air with their whoops as Princess White Eagle and Chief Wolverine crowned the new chief with a war bonnet of eagle's feathers.

Photos show (left) Chiefs and braves in their canoes cluster round the big ship as she arrives, (right) The final ceremony, and the deer skin certificate of adoption.

Vacation Musings

The writer of this column is on a brief vacation, and he intends enjoying it to the full. During the blistering hot days of the summer with its strong hot winds and choking dust storms he stayed "on the job." Now he has hied himself to the lakes and the woods to rest and to play. Se he proposes to fill his column this week through the medium of a pair of scissors and a paste pot. This is not an altogether unknown procedure on the part of some editors, but open confession is not always made as frankly as in the present instance.

In starting on his vacation, the writer desired to get away not only from the hot city pavements, but even more so from the constant talk of depression, hard times, unemployment, which forms the basis of conversation on every hand. He felt it would be a great relief to get back to Mother Nature, and listen to the rippling of the water, the murmuring of the leaves, the song of the birds, and the droning of the bees and insects.

And for his reading he brought along, not a daily newspaper, nor a fiction magazine, nor text books and bulletins on economics, finance or salishness, but some little pocket editions of essays by and wise sayings of other men. And it is with scissors and paste pot in this idle hour that he proposes to pass a few of these gems on to the readers of this column in the hope that, for a little time at least, their thoughts may be diverted from these things which lead to present discouragement. So, here goes:

"Like most garments and most carpets, everything in life has a right side and a wrong side. You can take any joy, and by turning it around find troubles on the other side; or you may take the greatest trouble, and by turning it around find joy on the other side. The gloomiest mountain never casts a shadow on both sides at once, nor does the greatest of life's calamities."

"When you make a mistake, don't look back at it long. Take the reason of the thing into your own mind, and then look forward. Mistakes are lessons of wisdom. . . . The past cannot be changed. The future is yet in your power."

"A great many people criticize and find fault; that's jawbone. Some things were better, but do nothing to help; that's wishbone. Others cooperate and do things, that's backbone."

"When you get into a tight place and everything goes against you till it seems as though you could not hold on a minute longer, never give up then; for that is just the place and time that the tide will turn."

"Nothing is easier than fault finding; no talent, no self-denial, no brains, no character are required to set up in the grumbling business."

"The most trifling actions that affect a man's credit are to be regarded as the sound of your hammer at five in the morning, or nine at night, heard by a creditor, makes him easy six months longer; but if he sees you at a billiard table, or hears your voice at a tavern, when you should be at work, he sends for his money the next day."

"The tendency to persevere, to persist in spite of hindrances, discouragements, and impossibilities; it is this that in all things distinguishes the strong soul from the weak."

"Of every good quality, there is an excess which is undesirable. Excess of self-reliance leads to secretiveness and mullish obstinacy; of curiosity to impudence; of imagination to hesitation and inaction; of foresight to indecision; of patience to weak submission; and so on. To give due weight, rather than its due weight, to each ingredient in the composition of character, we are fortunate if we are blessed with those twin senses, a sense of proportion and a sense of humor. As a sweetener of life, preserving the rich and successful from odious self-satisfaction and helping all to banish the demons of discontent and ill-will there is nothing to compare with a sense of humor."

"Speaking of unemployment, says 'Life Magazine,' the average man has 12,000,000,000 brain cells. Get busy. Put them to work."

When skies are kind of gloomy,
And the outlook awful dim,
Just keep on keeping on.

Market For Wheat In Ireland

Senator Esmond of Irish Free State Points To Opportunity

Canada should be able to enter into a mutually satisfactory trade agreement with the Irish Free State, in the opinion of Senator Sir Thomas Gratten Esmond, member of the Upper House of the Irish Dail, passing through Montreal after fishing expedition with Lady Esmond among the salmon streams of Quebec.

"Canada should be able to sell us much of our wheat," he said. "The Free State buys three-quarters of its wheat requirements abroad, and there should be no reason why Canada could not make a treaty with us on the same lines as that under discussion with New Zealand and that concluded with Australia. I certainly shall look into the subject when I get back to Dublin."

Speedy Mail Delivery

A record for speedy mail distribution was made by the Canadian Pacific liner "Empress of Britain" the other day when letters posted in London at 8:15 p.m., July 28th, were landed in Montreal and distributed before 10:30 a.m. on August 3rd, the time made (with Canadian Airways) "planes picking up the sacks at Father Point," being thus 5 days, 16 hours and 15 minutes.

Alberta Natural Resources

Regulations Providing For Administration Now Being Published

Complete regulations under the acts providing for the administration of the natural resources of Alberta is being published in a special issue of the Alberta Gazette, running to 300-odd pages. It will be followed by the publication of a series of pamphlets giving the various regulations separately. The new homesteading and fishery regulations, which have already been announced in summary form, constitute an important section of the volume, and among the other items will be those affecting the forestry reserves, timber, placer mining, petroleum and gas, coal and quartz mining, fur farming, and the various regulations applying to grazing leases and permits.

Hawk Travelled Far

The migrating radius of the Swainson hawk is illustrated by the discovery that the Canadian tag No. 50 worn by a bird of that feather, killed in Argentina, South America, some months ago, was placed on the bird during 1929 by Glen and Jack Schwedfager, of Halkirk Lake, Alberta. Jack Miner, Kingsville, Ont., a naturalist, has received this information.

Dysentery Is a Very Dangerous Bowel Complaint

Mrs. E. M. Ward, 627 Ave. H. South, Saskatoon, Sask., writes:—"When my husband was in France he took dysentery, and was in hospital over a year. Ever since he came back he has had the attacks three or four times a year. I cannot emphasize the good Dr. Fowler's Extract of Wild Strawberry has done for him. He generally takes a few doses and gets relief in a few hours. "I cannot speak too highly of your excellent remedy, and you may be sure we are never without a bottle of it in the house."

Trade In Trees Curbed

Restrictions Necessary To Prevent Spread Of Insect Plagues

Restrictions have been placed by the Department of Agriculture on the movement of poplars and willows from the Maritime Provinces and certain areas in British Columbia because of the satin moth. Gaining a foothold in Nova Scotia and New Brunswick in 1930 after it had made inroads in British Columbia some years ago, the satin moth is a native of Europe and Asia. The restrictive regulations were passed to prevent its further distribution.

Importation into Canada of several varieties of pine wood has been banned by the Department of Agriculture because of insect plagues. On account of the white pine blister rust, every variety of the five-leaved species from all countries has been denied entrance to Canada. Imports of Austrian, Scotch and Swiss mountain pines has been prohibited, because of the European pine shoot moth. Recent shipments of pine from these countries have been found to be infested with the moth.

Recipes For This Week

(By Betty Barclay)

PICKLED PEARS

- 4 quarts pears.
- 2 pounds white sugar.
- 2 cups vinegar.
- $\frac{1}{2}$ ounce stick cinnamon.
- $\frac{1}{4}$ ounce whole cloves.

Peel pears. Boil the sugar, the vinegar, the cloves, and the cinnamon for 20 minutes. Place a few of the whole pears at a time in the syrup, and cook them until they are tender. Pack them into thoroughly cleaned jars. Adjust the rubbers, and fill each jar to overflowing with the hot syrup. Adjust the covers and seal the jars immediately.

CUCUMBER CATCHUP

- 1 quart ripe cucumbers, large.
- 1 cup white onions.
- 2 green peppers, medium-sized.
- 1 pint vinegar.
- 1 cup sugar.
- 2 tablespoons white mustard seed.
- Salt and cayenne pepper.

Pare the cucumbers. Cut in quarters and remove the pulp. Put the cucumbers, onion, and peppers through a food chopper. Add a small amount of water to prevent sticking, and boil the mixture until the cucumbers are tender. Heat the vinegar, sugar, and seasonings together. Add the vegetable mixture and cook it until it is clear. Seal in clean hot bottles or jars.

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestation of internal trouble.

Farmers Out Of Work

If Given Assistance Might Go On Land Again

The Province and the Dominion could perform no better national service at the present time than by making it possible for such men to re-establish themselves on small farms. The farms are available. Men can buy them at prices which will not mean a heavy burden of debt. They are small farms, with some land broken and some buildings up. About all it is necessary for the Government to do is to give assurance that help in the form of food and clothing will be available through the coming winter as required. No more aid will be required to be given, in fact in all probability less than would be required to maintain these men and their families in the city through the winter. The Provincial and Federal Governments would actually save money by getting these farmers re-established on farms, and, as well, taking constructive steps to relieve unemployment conditions. —Winnipeg Tribune.

Dragged Down By Asthma. The man or woman who is continually subject to asthma is unfitted for his or her life's work. Strength departs and energy is taken away until life becomes a dreary existence. And yet this is needless. Dr. J. D. Kallag's Asthma Remedy has brought a great change to an army of sufferers. It relieves the restricted air tubes, it guards against future trouble. Try it.

Survey Of Pasture Lands

A complete survey of all pasture lands in Canada is to be conducted by Prof. L. E. Kirk, of the University of Saskatchewan, announcement of whose appointment as Dominion Agrostologist was made in the House of Commons the other day by Hon. Robert Weir, Minister of Agriculture.

A new electric device tells exactly how sheer a silk stocking is.

W. N. U. 1905

"Best for You and Baby Too"

Baby's Own Soap
10 cents individual cartons

Cow Produces Over 63 Lbs.

Of Milk In 24 Hours

She Consumes a Pound and Half Meat Daily and Tests 6.4 Per Cent.

Fontaine Juliette, 53342, owned by Didsbury Jersey Farms, produced 63½ pounds of milk on August 23rd. The previous day her production was 62 pounds. She calved on August 1st, and dropped an excellent bull sired by Sultan's Oxford. She commenced her lactation period giving 48 pounds of milk daily and has shown a steady increase up to the present high figure. Her last test was 6.4 per cent.

This cow is one of the American type Jerseys purchased by Norman Clarke from the millionaire copper magnate, Jay P. Graves of Spokane. He secured her as a calf in Tennessee for \$600.00. She is recognized as one of Canada's leading dairy type animals and her picture was recently displayed throughout Eastern Canada by the Jersey Breeders Association.

She consumes a ration of 14 pounds of oat, barley, bran and oil cake chop daily. In addition she eats a pound and a half meat daily. The fat produced by this cow costs less than 6 cents a pound for feed.

Great Bear Lake Minerals

Company Is Formed To Develop Rich Northern Field

Formation of a corporation, backed by Detroit capital, to develop mineral finds in Great Bear Lake, was announced in Toronto by Thomas G. Donovan, research engineer of Detroit, Mich. The company is known as the Radium Corporation of Canada, Limited, and is capitalized at \$10,000,000.

Immediate development of the property on Donovan Island, situated in the centre of the rich precious metal finds, is to be undertaken by the company. Donovan Island is in Echo Bay, close to the east shore of Great Bear Lake. The other main finds are situated on the mainland. Valuable deposits of uranium, radium, and silver, with some copper, have been found there.

The mineral discoveries in the Great Bear Lake region are considered by engineers to have immense possibilities and have been described by some observers as even greater than the Cobalt, camp in Ontario. Uranium and radium are both chemical elements obtained from pitchblende.

Assays of mineral at Donovan Island revealed heavy content of uranium and silver. Uranium valued at \$10,000 to the ton was found in the assay. Silver was valued at \$1,035 to the ton, and copper at \$40 per ton.

Text Book Changes

Minor Alterations Have Been Made In Saskatchewan

Changes of only a slight nature have been made in the authorized text book list for both public and high schools in Saskatchewan, Premier J. T. M. Anderson has announced. Principal changes noted are the literature selections authorized for grade 11 and grade 12. The chief text book in literature has been retained however.

Child's Health Should Be Carefully Checked

So That Conditions Which Are Handicap Can Be Corrected

In many places they have what is called a summer round-up of the children who are to start school for the first time in autumn.

The idea of the round-up is to have the children medically examined. Those who, at that time, are found to be in need of medical care are sent to their doctor and their dentist for treatment in order that when they start school in the autumn they will be physically fit.

Parents should not wait until the child is ready to go to school to have this done, says the health service of the Canadian Medical Association. However, if they have neglected this point, it is best to attend to it now.

One of the commonest and most serious mistakes that parents make is to allow an abnormal condition to persist with the idea that the child will grow out of it, or that he is too young to have treatment.

The child who cannot see without glasses is obviously handicapped until he has been fitted with proper glasses. The child who has a running ear is almost surely on his way to deafness, which is a serious handicap, unless his ear is properly treated. Children do not grow out of such conditions.

Not only are diseased tonsils and teeth a handicap to the child, but they are dangerous in that they poison the body, and are, it is believed, very often the cause of heart and kidney disease in later life.

No child should be handicapped by conditions which can be corrected by proper treatment. There should be no delay in securing treatment simply because of the mistaken idea that the defects are not serious, or that the child is too young for the treatment or that he will grow out of the defects.

Persian Balm — alluring provocative and charming. Fragrant and refreshing as a cool breeze in summer. Delightful to use. Creates complexions of surpassing loveliness. Makes the skin velvety soft in texture. Soothes and dispels all irritations caused by weather conditions. Softens and whitens the hands. Persian Balm is a peerless toilet requisite for women who care for charm and distinction. Use it for hands and face.

B.C. Goats Shipped East

Livestock Branch Sends Selected Animals To Nova Scotia

Eighteen head of goats have been shipped by the Dominion Livestock branch from British Columbia to Nova Scotia for dairy and breeding purposes.

This is the first shipment of its kind made from the far western to the eastern province. These goats were selected from the best animals in the province and include three purebred Saanen males, three grade Toggenberg does and twelve grade Saanen does. The males were sold for \$50 each and the females brought around \$25.

The animals were selected by Arthur Morton of the Dominion Livestock branch. One of the bucks is related to Echo of Deerfields, world's record milk goat, which died recently at Victoria after establishing a record of 4,240 pounds of milk in 365 milking days.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

British Columbia Industries

Province Now Ranks Third In Manufacturing In Canada

In the year of Confederation, British Columbia was credited with 40 factories. Thirteen of these were saw mills and 11 flour mills, leaving 16 others, all of which were at Victoria. In 1901, British Columbia was fourth among the provinces in manufacturing and now ranks third, with about 725 establishments. "These statistics are therefore particularly interesting," says R. H. Arnott, industrial secretary of the Vancouver Board of Trade, "pointing as they do to the wonderful industrial future lying before Greater Vancouver area where 60 per cent. of the entire manufacturing enterprises of the province are located."

Wins Race Around World

Travelling around the world from east to west, K. Fukuma, Japanese newspaperman, succeeded in defeating a colleague who travelled west to east in a race to be first around the world using only regularly established means of travel, he states in a letter received at Vancouver by J. J. Forster, steamship general passenger agent of the Canadian Pacific Railway.

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE: After many adventures flying over China, Captain Jimmy agrees to fly General Lu to Japan. Running out of gasoline, he is forced to land on a lonely island.

There we were on that lonely little island; General Lu, the Chinese War Lord; Chung, his faithful servant; Fu the interpreter, Scottie and myself. Bank and fortune suddenly counted for nothing. We were four hungry men—and a dog. Even General Lu's huge fortune, which we had stored away in our plane would not buy us a square meal.

The sea stretched away on every side like a flat blue mirror. The island went back four or five miles and ended. Above the sky rose in a huge empty dome. "Look here General," I said, "you and I are going rabbit hunting."

After that we tramped and hunted for hours, but never found a rabbit. In fact, we never even saw a mouse or a squirrel. The island rose to a bald peak near the spot where we had landed. The remainder was covered with stunted brush, often burned brown from the sun's heat. The rocks were blazing hot.

More serious than the lack of game, was the absence of water. For four or five hours, we searched for fresh water, but not a drop could we find. As we walked home over a flat sandy plane General Lu suddenly gripped my arm.

In the sand was a long, stinky, track, as if you had drawn a stick along. At first I could make nothing of it, then it suddenly occurred to me that the mark was made by the tail of some animal while the sand was wet during the rain of the night before. A lizard or a turtle might have made it, but because the track appeared so far inland, it seemed probable that the creature was heading for some known water hole.

The track faded out after a few hundred yards, but soon another appeared. This in turn faded out.

We continued to follow in the direction the last track had pointed. Some large sand dunes rose in front of us. Climbing to the top of these, a very small, green valley appeared below.

Hurrying down, we found a deep rocky dell, from which came the distinct tinkle of water. Out from between two rocks poured a clear, cold spring!

General Lu drank so much, I really feared he would drown. Then we filled our water can and walked back to the plane, where Chung and the interpreter anxiously waited for us.

Meanwhile Scottie had gone on up the beach, and was busily digging the sand, and half growling to himself. The sand flew in all directions. Then he came racing back to me. Sure enough, he had found a nest of eggs buried in the sand. His rough methods had ruined some of them, but there were almost a dozen left.

I put the good ones in my helmet and back to the boys I went. "The Chinese seemed delighted and set about baking them by the fire. Well, perhaps I am not a very good judge, but to me those eggs surely seemed terrible."

The interpreter looked at me questioningly. "No like eggs?"

"The he pointed meaningly to the sea. 'Fish, he go nightie flnee—' catches, huh?"

That was an idea. The shores of that island had never been touched in a thousand years. No doubt the water fairly teemed with fish. But the suggestion nearly cost the lives of two of us on the next day.

(To Be Continued.)

Real Asset For Farm

Value Of Egg Production In Canada Last Year \$74,837,092

Few Canadians realize the extent to which egg production throughout the Dominion has expanded during the past decade, or the extent to which farm flocks are proving their worth as an important adjunct of the farming industry.

In a statement appearing in a recent issue of the Monthly Bulletin of Agricultural Statistics Canada's flocks of laying hens comprised a total of 25,044,870 last year, and these produced an aggregate of 278,255,753 dozen eggs, having a market value of \$74,837,092.

Ontario heads the list in the number of egg-producing hens with a total of over 13,500,000 for 1930; Saskatchewan comes second with 5,200,000; then in order come Quebec with 4,900,000; Alberta with 4,000,000; Manitoba with 3,000,000; British Columbia with 2,200,000; and the three Maritime Provinces with around half a million each.

The number of laying hens on farms increased from 23,755,356 in 1921 to 35,044,870 in 1930. The average production per hen increased during the same period from 78 to 95, nearly 20 per cent.

The average woman has no more honour than a man, and when it comes to clothes she has less on'er.

Mount Revelstoke Park

Thought To Be Highest Situated Park In The World

Mount Revelstoke National Park, British Columbia, situated above the clouds, is probably the highest park in the world. It covers an area of 100 square miles on the wide plateau which forms the summit of Mount Revelstoke. A new motor road to the top provides one of the most thrilling drives in the mountains. Known as the "Royal Drive" it has been included in the itinerary of every Royal party to tour Canada since the inception of the road. Ascending through heavy forest growth the view provided from the top is most spectacular.

New Style Embroidery

Embroidered ostrich eggs are the latest works of art of an Alsatian at Rouen, France. He picks the delicate shell with a fine needle, and draws the thread through, thus covering the egg in time with exquisite tapestry.

Glaciers In Rockies Are Receding

This Seems To Bear Out Theory That Climate Is Becoming Milder

Following observations previously made of glaciers, at the close of the Alpine Club's camp at Prospector's Valley on August 3, the president, H. E. Sampson, of Regina, and the honorary president, A. O. Wheeler, of Sidney, B.C., went to Mount Robson to ascertain the amount of recession of the Robson Glacier. Observations were first made in 1911, at the time of the Alpine Club of Canada's expedition to explore the Mount Robson region. The expedition was then accompanied by a party from the Smithsonian Institution, of Washington, D.C.

Subsequently the measurements have been checked twice, viz: In 1913, at the time of the club's camp at Robson Pass, and again in 1922, by H. E. Lambert, of the Topographical Survey of Canada, a member of the club.

From 1911 to 1913 there had been a retreat of 30 feet, and from 1913 to 1922 a retreat of 265 feet, or an average yearly retreat of 24 feet for eleven years.

Following the same tracks marked in 1911, on which the marks were still distinctly readable, measurements were now made and it was found that in the elapsed twenty years the ice had retreated 667 feet, or 402 feet for the last nine years, an average of nearly 45 feet per year, as compared with 265 feet for the preceding eleven years.

There was also in addition to a general shrinkage, a very remarkable change. In 1911 the ice forefront of the glacier had sent out two streams, one flowing northward via the Smoky River to the Arctic Ocean, the other southward via the Fraser River to the Pacific. This was all changed. The ice has receded so far on its eastern side, behind a rock rib, that the stream to the Arctic no longer existed, all the run-off from the ice being carried southward to the Pacific. This disposition clearly placed the Great Divide of the Rockies east of the Robson Glacier and Mount Robson undisputedly within the province of British Columbia. New rocks were now marked closer to the ice for future reference, and photographs for comparison with previous ones were taken.

The Tumbling Glacier, which falls very steeply for five thousand feet from the icefield below the final peak of Mount Robson and buries its nose in the waters of Berg Lake, appeared to have shrunken quite a lot in width of its icefall and to have lost much of its hold, precipitous front. It appeared to be as active as ever.

Observations made of the Illecillewaet, Aulken, Yoho and Victoria glaciers prior to the Alpine Club camp, and of the Robson Glacier after it, tend strongly to show a greatly increased recession of the ice

within the past ten years; also of a big decrease in volume, as shown by the uncovering of broad rock faces and cliffs where previously the ice was supposed to lie to the depth of hundreds of feet. The results would seem to bear out the theory of a very distinct change to milder climatic conditions moving gradually towards the climax of its cycle.

Seventy Years On Job

Watcher Of Seas Expert In Interpreting Weather Changes

Seven decades ago, in 1861, when the soldiers in blue were marching to fight in the Civil War, a mere youth obtained a job sighting ships and sending weather reports from the lonely Marine Recording Station out on the windswept tip of Cape Cod.

Now, 70 years later, Isaac Small, a lusty old man of 87 years, still holds the same position. With firm step and clear eyes, in raging storm and brilliant sunshine, he strides along the bluff near the station, his keen gaze directed toward the horizon. He is a perennial watcher of the sea, an expert in interpreting weather changes and checking the ships that emerge out of the blue distance.

His hair is white and his face is weather-beaten, but he shows none of the infirmity of age.

During 70 years of continuous service as a watcher of the seas, Isaac Small has seen more shipwrecks, assisted in more rescues, counted more ships and sent more weather reports than probably any other man alive. Out of the windows of his lonely windwept station, he has observed unbelievable changes in the ships whose names fill the pages of his worn and thumb-marked log. Acres of square-rigged, gleaming canvas have been replaced by mile-long streamers of thick, black smoke.

The history of the Marine Recording Station at North Truro dates back to 1796. In that year Isaac Small's grandfather sold to the U.S. Government ten acres of land, facing directly on the Atlantic Ocean. Of that original ten-acre plot, the continual buffeting and erosion of wind and sea have left only four acres, and Isaac Small's front yard is still disappearing at the rate of a foot every year.

Small's regular duties begin at daybreak, and end when darkness no longer permits him to see beyond the cliffs upon which his tiny house is perched. Every ship that appears within the horizon on its way to Boston Harbour is duly recorded by him, and the information forwarded by telegraph to Boston. In former years it was sent to the Chamber of Commerce, but at the present time the notification is given to private tug companies.

Besides this information, the weather bureau must be notified at intervals of every half hour during the day of the meteorological changes and weather conditions existing at the station.

But the hours from daybreak to darkness do not complete Small's working day. He is on call at any hour of the night to spread the alarm of an approaching storm, and if a ship in distress out in the darkness comes to his attention, it is his duty to notify the nearest coast guard station. Two special telegraph wires, a local telephone and a coast guard telephone are the means by which this lone look-out keeps in touch with the rest of the world.

Why Is This Thus?

Woman Doctor Wonders Why New Guinea Boys Play Like Girls

Dr. Margaret Mead, of New York, proposes to analyze the statement that "boys will be boys, and girls will be girls." She says that in New Guinea she found on a previous trip native boys playing with dolls and taking care of babies with all the enthusiasm of the little girls. Now she is going there again and for two years will endeavour to ascertain why this is thus. Her theory is that boys are simply taught to ignore girlish things in other lands and that they are naturally just as domestic in their tastes as the juvenile femininities. Dr. Mead should take some baseballs and marbles along and then see how much the New Guinea lads will reach for the dolls.

Needed It Later

An American film producer asked an English friend to watch the "shooting" of one of his society films to see that it was all right.

After a time the Englishman asked, "Why does that man keep on his hat when he's talking to a lady in the drawing-room?"

"Sure," said the producer, "he can't take it off—another lady's coming in presently, and he's got to raise his hat to her."

The world's largest snake is the reticulated python, found in the East Indies.

Not An Unknown Country

Contours Of Sea Floor Are Familiar To Geologists

Below the surface of the great oceans there lies more land by far than is comprised in the area of all the continents. It is not altogether an unknown country. The sea bottom is constantly studied and its general contours are familiar to geologists. It is known, for example, that the Atlantic Ocean lies above an immense plain, surrounded by an incline that rises very slightly for some hundreds of miles to the continental shores. In a few places are mountains under the seas, tops of which are lonely islands. And here and there are extraordinary depressions, deeper by a mile or more than the general ocean bottom.

One of these lies between Cuba and Honduras, and is called the Bartlett Deep. Not much is known of it except that it is two miles deeper than the ocean floor and is like a gigantic crack, a thousand miles long and about fifty wide. It is suspected to be of volcanic origin, and it is thought that seismic disturbances may still begin in its dark depths, four miles below the surface, of the Caribbean Sea. This is a problem of importance, for an uneasy and unreliable fault in this location may make it inadvisable to pursue any further the project of a Nicaraguan Canal. There are some geologists who think it possible that an earthquake in the Caribbean might drain the water from the lakes which are to be linked to form the canal.

The navy proposes to find out as much as possible about conditions and contours in this submarine trench by an exhaustive hydrographic survey. Curiosity concerning the sea bottom might be enough to account for this undertaking, but it has a more practical occasion in the necessity for exact knowledge concerning earthquakes and their effect on the affairs of commerce.

Important Decision Of King's Bench Judges

Rule That Man Is Twenty-Three Until He Is Twenty-Four

When is a man 23 years of age? Five judges of the King's Bench Division, including the Lord Chief Justice, Lord Hewart, decided in a case that was being appealed in the Criminal Court of Appeal recently that a man is 23 until he is 24. The question arose over a section of the Criminal Law Amendment Act. Lord Hewart asked: "Does not a man cease to be 23 the moment he passes into his 24th year?" Counsel for the appellant submitted that a man was of the age of 23 for a period of 365 days—in other words, he was 23 until he was 24. The Lord Chief Justice announced that on the ground that there was ambiguity in the law the subject should have the benefit of the doubt, and the Court had decided to allow the appeal in behalf of the accused man.

Loudspeaker For 'Planes

Designed Especially For Use In Fighting Forest Fires

A newly-developed loudspeaker for airplanes, designed especially for use in the fighting of forest fires, has been tried out successfully at Roosevelt Field, New York. The loudspeaker, which weighs 100 pounds, was tried in a Fokker plane piloted by N. C. Brown, who flew at a height of 1,200 to 1,500 feet, circling the field and talking. He was heard clearly over a radius of more than a mile. The speaker uses a wind generator and it will be adapted for use by police, the sponsors said.

Payment In Arrears

Prof. G. P. Lestrade, of Pretoria University, condemns the South African natives' practice of paying in arrears for wives on the instalment plan. Nothing is more calculated to militate against the serenity of marital relations than the consciousness that there are still a few cows owing on the wife.

A Seven Months' Tow

On the longest towing voyage on record a floating dock of 17,000 tons lifting capacity is on its way from the builders in Walland, England, to Wellington, N.Z. The tow of 13,500 miles will last seven months. Two powerful tugs are employed and the crew is living on the dock during the voyage.

The ambition of King George V. of England to own the most complete collection of British postage stamps in the empire over which he rules has been realized.

After a girl marries the apple of her eye, he turns out to be a crab apple.

And there's this about a monarchy, the one who is going to rule is taught how to do it.

A Clever Engineer

Long List Of Achievements Credited To Sir Alexander Gibb

Sir Alexander Gibb, who has come to Canada to prepare a report on the ports and harbours, comes of an ancient Scottish family with engineering in its blood. He himself was a pupil of Brunel and Barry, and the list of his achievements and decorations fills a whole column of "Who's Who." They include such widely different undertakings as the dockyard at Rosyth and the wonderful aquarium at the Zoo. During the war Sir Alexander played a chief part in developing the Channel ports for the disembarkation of the army, and he was consulting engineer for the great new naval base at Singapore. He is a keen student of Burns, a member of the ancient King's Bodyguard for Scotland, and belongs to no fewer than ten clubs.

Changed Its Nature

X-Ray Experiment Converts Annual Plant Into Perennial

In experiments to learn more about effects of X-rays upon evolution, an annual plant has been changed into a perennial at Cornell University, Ithaca, New York.

The plant which changed its nature at Cornell is the eucalyptus, the closest relative to corn. There are two species, Mexican, the annual, and perennials, the perennial.

Some of the seed was exposed to X-rays for a few minutes and then germinated. The young stalk began life as an annual, but later on, while still young, it developed some of the appearances of a perennial. Then the annual portion dried up and disappeared, and the remaining stalk developed into a true perennial.

Trans-Canada Highway

Four Hundred Miles Of New Highway To Be Built Between Kenora and Heron Bay

The decision has been made by the Ontario Government that the trans-Canada Highway will run through the Ottawa Valley to North Bay and will go east from Kenora to Heron Bay. With regard to the intermediate stretch, it has not been decided whether the highway will be routed by Cochrane or Sudbury. In the stretch between Renfrew county and North Bay, there will be a partial re-location over a stretch of 100 miles. In the western section, between Kenora and Heron Bay, 400 miles of new highway will be built.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Brandon Industrial Survey

Facts Collected Will Be Published In Booklet Form

Brandon's most comprehensive industrial survey recently completed by Prof. Burton Hurd of the Manitoba College, for the use of the Brandon section of the Industrial Development Board of Manitoba will be partially published in booklet form. Facts concerning the city, not previously available, are given in a concise and interesting manner, and should be of special interest to industrial firms contemplating a site in the West.

Poland expects to receive \$2,000,000 from its state lottery this year.

Troubles Of Occident Diagnosed By Oriental

Western World Needs Philosophy and Not Money Opinion Of Chinese Merchant

The Orient, through the eyes of K. C. Li, one of the world's leading Chinese merchants, with traditions of 4,000 years of business behind them, has looked at the Occident and diagnosed its troubles.

Philosophy, not money, is what is needed in the Western world. There are other serious dislocations, but time will cure them, Mr. Li said smilingly.

Seated in his modern office toward the top of the Woolworth Building, surrounded by a barrage of telephones, electrical refrigeration equipment and other accessories to Western business, Mr. Li lent an Oriental touch to his conversation by wearing a silk mandarin coat. Meanwhile he calmly directed the business of the Wah Chang Trading Co., a leading dealer in antimony, and answered a few questions on Chinese trade put to him by an international banker. He referred frequently to the latest treatises on economics.

"The chief difference between Oriental and Occidental psychology is money," he said. "In the Anglo-Saxon world, if a man loses his money he has lost all; in China, loss of money is a mere incident. Our philosophy places life first and reputation second, with material things, like money, a mere incident."

"It is because of this stress on money that we in this country emphasize the depression too much, and thus make it worse," said Mr. Li.

"I do not need to go back to China to get the answer," said Mr. Li. "I need only to refer you to your own Mark Twain, a real philosopher, who said, 'The difference between prosperity and panic is only 15 per cent.'"

Stabilization of silver, cancellation of all reparations payments and lowering of the world-wide tariff walls are other important steps toward bringing things back to normal, said Mr. Li, but restoration of a calm, assured attitude is the most important step. Other reforms will come in time, he said.

"I venture to say that the American people are a million times better off in material things than the Chinese at the present time," said Mr. Li. "Yet I doubt that they are much happier."

"Because they have not quite as much money as before the Americans are seeing ghosts in the daylight. They are afraid of what might possibly happen. They start to curtail expenses. The butcher, the baker and the grocery man are affected. He cuts down his orders. Trade slumps more. It is a vicious circle," said the Chinese merchant.

Makes Convicts Superstitious

Grass Will Not Grow On Murderer's Grave In Leeds Prison Yard

In the murderers' graveyard of Armley Jail, Leeds, England, a brown patch stands out in sharp contrast with other grassy mounds. It is the grave of Lee Doon, a Chinese laundryman, who was hanged eight years ago for the murder of his partner, Sing Lee. All efforts to grow grass on the plot have failed. So planted on the grave by prison workers died. Expert gardeners have sown seeds on the mound, but they never grew. Every new warden, anxious to dispel superstition increasing among the convicts, has experimented with new methods, but the patch remains barren. While waiting for the day of execution, Doon ate heartily. He insisted on many plates of ham for breakfast, chicken and rice for dinner, two glasses of beer a day and innumerable cigarettes. His fondness for tobacco was displayed on the execution block when the hangman was forced to remove a half-smoked cigarette from Doon's lips before he could adjust the cap and pull the lever. To his spiritual adviser, the Chinese said he would return to earth in 18 or 20 years, but not, he said he hoped, as a Chinese.

Conditions In Egypt Ideal For Aviators

Climate Has Been Proved Most Suitable For Flying

Recent aerial events in Egypt have thrown much light on the great suitability of the Egyptian climate to aviation. Pilots rarely complain of atmospheric conditions being prejudicial to flying, and this leads to the hope that Egypt will one day not only become a great aviation centre or halfway aerodrome for the world, but will provide an ideal spot for the establishment of an international school of aviation.

A big electrical company has found that reducing the thickness of its filing cards by a hair's breadth has saved space in its offices equal to a roomful of clerks.

New Material Found

Canada May Soon Be Able To Manufacture Mineral Wool

The important discovery that certain deposits of rock in the Niagara district of Ontario are suitable for the production of rock wool, a valuable insulating, lining and covering material, features a report issued by the mines branch of the Department of Mines. The report, by M. F. Goudge, deals with the possibility of establishing an industry in Ontario and manufacturing rock wool, which is classed as one of the most effective insulating materials known.

Rock wool, or mineral wool, as it is sometimes called, the report states, is not manufactured in Canada at present, as hitherto suitable raw materials were not known to exist within the Dominion. It is made from shaly limestones which possess certain definite characteristics. Research carried on in the laboratories of the mines branch by Mr. Goudge, indicate that several deposits of impure limestone outcropping at various places between Niagara Falls and Hamilton are suitable for making rock wool.

In the process of manufacture, the natural rock is mixed with coke and charged to a small blast furnace where it is melted. The molten rock issuing in a small stream from the base of the furnace is blown into a myriad of small globules by a blast of high-pressure steam. As the molten globules hurtle through the air each develops a very thin, pliable glassy fibre behind it. This fibre is known as rock wool.

The discovery of the suitability of the Niagara district rock for the manufacture of this commodity suggests the possibility of a new and valuable product being added to the mineral production of Canada, the report states.

THE RHYMING OPTIMIST

By Aline Michaels

THE GLEAM ALONE

The friends whom I most love
Are like the stars to me,
As those far bodies move
Along immensity.

The stars are worlds, we know,
And worlds hold joy and pain,
Hold ecstasy and woe,
And purity and stain.

But of those worlds afar
We see the gleam alone;
The glory of the star
That on our path has shone.

And so in friends most dear
I see no fault, no blight,
But only joyous bloom
And opulence of light!

Should Be Congratulated

Woman In California Keeps Employees Regardless Of Age

There is a very special and particular achievement for which Mary K. Solari deserves congratulations, entirely aside from the fact that she has just completed her twenty-fifth successful year in the restaurant business in San Francisco. That is the stand that she has taken, as a business woman and as a human being, against the theory of "firing after forty," which has become so lamentable a practice in businesses and industries throughout the United States.

Out of eighteen employees, four have been with her more than twenty years; five, over fifteen years; four, over ten years, which, in a staff of that size, is an extremely high percentage of long service.

Business women may justly feel proud that another business woman has taken up the cudgels so vigorously against this ruthless pushing aside of the so-called middle-aged without consideration of ability or intelligence.

A Good Investment

Comment has been made on the vast waste among beekeepers through the use of poor equipment. Well made hives with good frames of correct size are a good investment. Once combs are built they can be exchanged from hive to hive and used anywhere as needed. One is amazed to find the extent of the use of makeshift hives and frames.

New Source Of Revenue

Among the emergency bills sent to the Uruguayan congress and designed to help solve the financial crisis there is one requiring privately owned automobiles to pay from 20 cents to \$1 daily according to size for a permit to operate. Permits would be issued in the form of a large sticker with the day's date, pasted on the windshield.

WHEN GASTRIC JUICES FAIL TO FLOW

You know how badly an engine runs when it gets clogged up. It's the same with your body when your gastric—or digestive—juices fail to flow. Your food, instead of being assimilated by your system, simply collects and stagnates inside you, producing harmful acid poisons. What you need then is a tonic—Nature's own tonic—Nature's six mineral salts. You get all these six salts in Kruschen Salts, and each one of them has an action of its own. Together, they stimulate and tune up the bodily functions from a number of different angles. The first effect of these salts is to promote the flow of the saliva and so awaken the appetite. The next action occurs in the stomach, where the digestive juices are encouraged to pour out and set upon the food. Again in the intestinal tract certain of these salts promote a further flow of these vital juices which deal with partly digested food and prepare it finally for absorption into the system.

So you see there is no mystery about Kruschen. It works on purely scientific and well-known principles. Prove it for yourself.

Little Helps For This Week

"Except ye become as little children, ye shall not enter into the kingdom of heaven."—Matthew xvii, 3.

Except your Father lead you, You cannot find the way. Among the snares and pitfalls, The lures that lead astray; Except you be like children, And hold the skirts of love, You'll miss the narrow pathway That leads from earth above.

—Mary Frances Butts.

Blessed are ye if ye become as a little child, for a child is the visible likeness of the Lord Himself. And there is a blessedness in perceiving this truth; the blessing is the truth itself. He who sees the essential in the child—the pure childhood—sees the essence of grace and truth; in a word, real childlikeness. —George MacDonald.

Distemper responds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

Market For Alberta Coal

Orders For 55,000 Tons Received From Winnipeg Firms

Investigation of the quality of various Alberta coals with a view to determining the fuel best suited to the requirements of the Winnipeg City Hydro-Electric is being undertaken by G. W. Oliver, fuel engineer for the City of Winnipeg. It is pointed out that Winnipeg will be in the market during the coming winter for 40,000 tons of coal for its central heating system and the contract will be placed with various Canadian companies. Orders for 55,000 tons of Alberta coal have been placed recently by large Winnipeg concerns.

Crude Oil Satisfactory

Upward of 200 barrels of crude oil per day are now being taken from the Ribstone wells for the use of the Canadian Pacific Railway in their locomotives on the mountain division between Calgary and Field, B.C. The railway company is stated to have found the fuel from the Ribstone area in eastern Alberta highly satisfactory and is likely to increase its acquisitions in the near future.

Expects Stork in July

"I Suffered such Pain"

MOTHER advised me to take the Vegetable Compound because I suffered such pain each month.

"It helped me so much that after I married I still took it. I am expecting a little one in July and I depend upon Vegetable Compound. My sister takes it too."

Mrs. Aubrey S. Smith, P. O. Box 104, North Sydney, Nova Scotia is only one of thousands of women who depend on Vegetable Compound to carry them over difficult times. Won't you try it, too?

Lydia E. Pinkham's
VEGETABLE COMPOUND

There is perhaps nothing that interferes more with effective school work than parties given during the school week. If the time actually spent at the party alone be considered, the ill-effects on school work would possibly not be so marked. But experience has taught all of us that the mind cannot be centered on school work either while anticipating a jovial time or while the impressions of a night of amusement are fresh in our memories.

Don't Grope in the dark

MANY do their buying as though they were blindfolded — "I'll try this" or "I think this will do." These have only the vaguest idea of what they want as they spend large slices of the family income. Others read the advertisements regularly and buy with their eyes open. They know what they want before they go to buy.

Advertisements are beams of light on merchandise. They reveal to you the latest and best products and improvements of the manufacturers and merchants.

Advertisements are a record of progress. They are interesting and instructive news of the business world. They light the way to better buying. Read advertisements regularly and live better at less cost.

Town & District

A heavy frost struck the district Sunday night.

The Indians are busy travelling the roadway on the reserve from the Old Sun school to the railway track.

Softball is over for this season. What will we argue about now?

A bread war struck town over the week-end. The Red & White are selling five loaves for a quarter.

The officials of the Blackfoot reserve are now granting permits to shoot at Stobart Lake this year.

The town streets were dragged last Friday which made a great improvement in their appearance.

Owing to the danger from freezing the council contemplate to turn off the water in the irrigation pipes by the 20th instant. Everyone should take notice of this and get all the water they need before that time. The taps should be protected at night until the water is turned off as it does not take much frost to destroy these taps.

The sidewalk on growfoot Street Tuesday received a new coat of cement to fill up the numerous holes in the walk.

Mr. J. Christenson presented the Call with a basket of vegetables Tuesday. We have not yet had time to sample them but from their looks they will make fine eating.

The local duck hunters report having had good luck Tuesday afternoon the opening day.

Last Monday Jack McHugh had his team runaway starting from Wm. McConnell's shed. They sailed down the Gleichen street hitting the high spots. The only damage done was when they tossed the gas drums from the wagon onto the ground.

St. Andrew's W. A. will hold a bridge and whist drive over the butcher's shop, on Friday, September 18th, at 8 p.m. Admission 35c.

The work of building some ten kitchens to houses on the Blackfoot reserve started Monday. Carpenters Scott and Thompson have the job and later on they will build a new home for C. J. Lewis of the Indian Department.

Doug Mattson left last week for Calgary to attend the Normal school.

Hugh Hamar returned to High River last Monday after spending two weeks vacation in Gleichen visiting his parents.

Next Saturday, September 19th an air circus will be held in Gleichen under the auspices of the Canadian Legion.

As we go to press word has been received that Mrs. Wm. Service, St. formerly of Gleichen died in a Calgary hospital. The funeral will take place at Gleichen on Thursday afternoon.

Miss E. Bowen returned home last Thursday evening from Didsbury where she had been employed for sometime.

Rain held up harvesting and combining most of last week.

On Sunday next September 20th The Gleichen Baptist Church will hold their usual weekly service in the Gleichen Community Hall at 7:30 p.m. to be conducted by Wm. Aberhart B.A., of the Prophetic Bible Institute, Calgary to which all are cordially invited. After the regular service the Communion Ordinance will be observed.

The 1926 dollar is now worth \$1.55 in buying clothes, \$1.38 in purchasing foods, \$1.72 in paying the electric light bill, \$1.29 in building a home and \$2.19 in replacing the worn tires on the family car, according to the results of a survey announced on authentic survey for the United States.

Nov. 21—St. Andrew's W. A. Banquet.

FOR SALE—Several hundred sacks Sugar sacks, Potatoe sacks at 3 cents each. Cash or produce in exchange. At the Eventide Home.

The minister, Rev. V. M. Gilbert, will address both services.

Here and There

One thousand men will be employed and over \$500,000 expended on highway repairs in Cape Breton and Richmond counties, Nova Scotia, during the coming autumn.

Miss Pauline Garon, Montreal motion-picture queen, formerly of Hollywood, sailed on the Canadian Pacific liner "Montcalm" recently, to make pictures in England and France.

Salmon taken in 1930 from British Columbia waters totalled close on 37,000,000 weighing more than 216,000,000 pounds. Number of fish was 8,500,000 more than in the biggest previous salmon catch year of 1926.

The New Brunswick Government is preparing to face the problem of unemployment on a practical basis this winter and has instituted a registration system through city and town clerks, who will gather full data as to out-of-work and their families.

Sir Lionel Fletcher, captain of the British rifle team, which competed against Canadian shots at Toronto and Ottawa, following the historic Bisley meeting, was warm in praise of Connaught Ranges, on his return to England. It is hoped that another Old Country team will compete in Canada next year.

Queen Helene of Roumania and her sister, Princess Irene of Greece, gave British railroad officials a shock recently, by travelling from London to Scotland, third class. The Queen smilingly declared that she was very comfortable and did not want people to know she was travelling.

The name of Admiral of the Fleet Earl Jellicoe has been added to the long list of distinguished travellers over Canadian Pacific steamship and rail lines. "Hell-fire Jack," as he is affectionately called, arrived in Montreal on August 22, on the liner "Duchess of York," to open the Canadian National Exhibition, at Toronto.

Hector Macdonald, of Montreal, was winner of the prize offered by E. W. Bonny, chairman and president of the Canadian Pacific Railway, for the competition between pipers representing the 17 Scottish militia units of Canada, at the Highland Gathering recently held in the grounds of the Banff Springs Hotel, Banff, Alta.

Among recent guests at Banff were Congressmen and Mrs. Frederick R. Lehigh, of Washington, D.C., and Newark, N.J., on their way to the convention of the National Federation of Federal Employees at Seattle. They expressed themselves delighted with their stay at the Banff Springs Hotel, punctuating a journey from Montreal to the Pacific Coast over Canadian Pacific lines.

H. M. King Prajadhikop of Siam, accompanied by Queen Rambhai and a numerous suite, has been seen in western life, with a Banff Springs Hotel as headquarters. He was recently made member of the Trail Riders of the Canadian Rockies, following a week train expedition, and also attended a polo match for him at the "Bill" Brewster's dude-ranch, Kamloops, Alta. His Majesty has also devoted considerable time to photography, golf and fishing.

The Nova Scotia fish catch for December last was 12,161,600 lbs., having a landed value of \$265,111, as compared with a catch of 10,480,700 lbs. with a value of \$325,552, for the corresponding month of the previous year.

Total amount of capital invested in Canada from other countries at the end of 1930 was \$6,375,533,000, an increase of \$229,000,000 as compared with the total at the end of 1929. Of this outside investment, 61 per cent. is said to be from the United States; 35 per cent. British; and 4 per cent. from other countries.

The yield of potatoes in Canada in 1930 totalled \$1,933,333 bushels, from 574,500 acres, an average yield of about 142 bushels per acre. In 1929 the yield was 66,500,000 bushels from 543,727 acres, or an average yield of 122 bushels per acre. Potatoes are grown successfully in commercial quantities in every province of the Dominion.

The Canadian Pacific Railway has announced placing of orders with the Algoma Steel Company of Sault Ste Marie for 30,000 tons of 130 lbs steel rail for spring delivery, representing a value of approximately \$1,500,000. This unusually heavy rail will be laid on 150 miles of the company's main line in the Mountain Division of British Columbia.

Prescott, Ont., Canada's newest national port, is rapidly approaching completion. The \$5,500,000 terminal which the Canadian Government is building there as a turning point for the Upper Great Lakes grain boats when they come down through the Welland Canal in the spring of this year will be ready for traffic in advance.

Canoeing history was made at Quebec recently when the seven Levele brothers piloted their craft over the ice-dotted waters of the St. Lawrence between Quebec and Levis in the remarkable time of 9 minutes, 43 seconds, and took first place in the canoe race which was one of the features of the Quebec Winter sports season with headquarters at the Chateau Frontenac.

In France wheat is selling at \$1.25 per bushel and here 22c.
